ABSTRACT

A vapor pressure reducing agent for polyurethane foam, comprising at least one compound represented by the following formula (1):

5
wherein R^1 , R^2 and R^3 represent a straight-chain alkyl group or branched-chain alkyl group having 2 to 5 carbon atoms, R^1 , R^2 and R^3 may be the same or different, with the proviso that the compound wherein R^1 , R^2 and R^3 are all
10 ethyl groups is excluded, the compound having a total acid content of 650 mg KOH or less as measured in accordance with MIL H-19457; and a premix composition for producing polyurethane foam, comprising a polyol, a curing catalyst, 1,1,1,3,3-pentafluoropropane, a foaming stabilizer, and
15 the vapor pressure reducing agent described above.
